An ISO 13485:2016 CERTIFIED ISO 29463-5:2022

LOS ANGELES ABRASION TESTING MACHINE

CE

OT-LAA-119

This machine is for determining the resistance to wear off small size coarse aggregates and crushed rock. The machine consists of a hollow cylinder, mounted on a sturdy frame on ball bearings. A detachable shelf which extends throughout the inside length of the drum catches the abrasive charge and does not allow it to fall on the cover. The drum is rotated by an electric motor through a heavy duty reduction gear.

Note : Drums are available in different sizes.
