STEAM JACKETED KETTLE WITH TILTING ARRANGEMENTS

CE

OT-SJK-208

Steam Jacketed Kettle that is widely used in pharma, food and various industries. This kettle is widely appreciated for its sturdy finish. Further, to meet the diversified demands of our esteemed clients. Latest technology in conformity with the international quality standards. Acknowledged for their precise dimension, high strength, abrasion resistance, easy usage, low maintenance and compact design. The inner surface of kettle is driven by attached geared motor or gearbox motor attachment. The scraper attachment ensures that there is no blackening or charring of product while cooking or heating using SS-304.

Model No. Capacity
